Building Management & Security High Availability

PROTECTING SYSTEMS FROM DOWNTIME AND DATA LOSS

High Availability for Building Management & Security

SIOS Technology protects building management, surveillance, and security systems from unplanned infrastructure, network, and application failures and disasters. SIOS software ensures essential applications automatically recover from failures – keeping data protected, applications online, regulatory requirements met, and users productive.

Meet Availability SLAs and RTO/RPOs with Ease

SIOS gives you the flexibility to build SAN and SANless clusters for Windows or Linux environments on physical servers, virtualized servers and in the cloud. You can use SIOS software to achieve high availability or disaster tolerance. Easily move Windows Server Failover Clustering to the cloud without disruption or easily build a Linux clustering environment with application-specific intelligence built-in. In the cloud, you can configure clusters across availability zones or regions for maximum HA/DR protection or create hybrid cloud or multicloud configurations to meet availability SLAs and RTO/RPOs with ease.

Systems, Databases, and ERPs Protected

SIOS products protect various applications and the databases they run on from downtime and data loss. Protected applications from leading providers including:
SQL Server, SAP, SAP S/4HANA, Oracle, SharePoint Learn More
Environments & Platforms Protected

Microsoft Azure Cloud, AWS EC2, Google Cloud Platform, Hybrid Cloud, VMware, Hyper-V, On-Premises Learn More

Operating Systems Protected

Windows, SUSE Linux, Red Hat
