

SIOS Financial Services High Availability

PROTECTING SYSTEMS FROM DOWNTIME AND DATA LOSS

High Availability for Financial Services

Minutes or even seconds of downtime can be critical for businesses providing financial services and 24-hour transactions. SIOS Technology clustering software protects banking applications running on essential databases such as SQL Server, SAP HANA, and MaxDB from downtime and disasters. SIOS delivers 99.99% availability, keeping data protected and users productive.

Meet Availability SLAs and RTO/RPOs with Ease

SIOS gives you the flexibility to build SAN and SANless clusters for Windows or Linux environments on physical servers, virtualized servers and in the cloud. You can use SIOS software to achieve high availability or disaster tolerance. Easily move Windows Server Failover Clustering to the cloud without disruption or easily build a Linux clustering environment with application-specific intelligence built-in. In the cloud, you can configure clusters across availability zones or regions for maximum HA/DR protection or create hybrid cloud or multicloud configurations to meet availability SLAs and RTO/RPOs with ease.

Systems, Databases, and ERPs Protected

SIOS products protect various applications and the databases they run on from downtime and data loss. Protected applications from leading providers including: SQL Server, SAP, SAP S/4HANA, Oracle, SharePoint [Learn More](#)

Environments & Platforms Protected

Microsoft Azure Cloud, AWS EC2, Google Cloud Platform, Hybrid Cloud, VMware, Hyper-V, On-Premises [Learn More](#)

Operating Systems Protected

Windows, SUSE Linux, Red Hat [Learn More](#)
