Why Partner with SIOS
SIOS Partner Program

SIOS Technology provides high availability (HA) and disaster recovery (DR) solutions that protect stateful Windows and Linux applications, ERPs, and databases that are used in a wide range of industries, including healthcare, manufacturing, retail, financial services, and education. SIOS clustering software features unique application-aware intelligence for unparalleled reliability and operates across on-premises, cloud, hybrid, and multi-cloud environments for automated protection from local, site-wide and regional disasters. Delivering, flexible protection for essential applications such as SQL Server, SAP, HANA, MaxDB, Oracle running on server or virtual servers on premises or in Microsoft Azure, AWS EC2, or Google Cloud Platform cloud.

Add **SIOS DataKeeper Cluster Edition** to Windows Sever Failover Clustering to synchronize local storage for failover clustering without the need for shared storage or costly database upgrades

SIOS LifeKeeper delivers complete HA and/or DR failover and replication while monitoring and protecting against issues in the entire application environment stack.

Easy to Sell
- Meet growing customer demand for HA/DR for complex application and ERPs
- Highly differentiated product with unique application intelligence built-in

Easy to Manage
- Consistent deployment and management of HA/DR across Windows, SUSE Linux, Red Hat Linux, Oracle Linux, and Rocky Linux and across on-premises and cloud environments
- Out of the box HA – no tuning or scripting needed
- Eliminate complexities of SAN administration

Technical Support Excellence
- 97% customer loyalty
- Award-Winning Support from HA Experts
- Named 2023 Technical Support Team of the Year and 2023 Presales Support Team of the Year by American Business Awards
- Support for partners and customers from pre-sales, POC and post sales

Unmatched Reliability
- Application-specific Recovery Kits Eliminate Scripting Errors
- Failover/replication follow application vendor best practices

Low TCO
- Multiple licensing options
- Saves 70% of application licensing costs by enabling HA for SQL Server or Oracle Database Standard Editions.
- No costly specialized skills needed
- Eliminates the cost and single point of failure risk of shared storage (i.e., SANs)
- Reduce data transfer costs in cloud environments

Performance Optimization
- Efficient replication engine minimizes network traffic
- No additional hardware accelerators or compression devices required

Certified Solutions
- Certified by Microsoft Azure, AWS EC2, and Google Cloud Platform
- Only Microsoft-certified solution supporting WSFC in Azure/AWS
- SAP-certified High Availability NetWeaver and SAP HANA
- AWS ISV Accelerate Program
- Microsoft ISV Growth Partner
